@NicoBrait

Christmas TTDT exclusively for the \$POWER community

In order to **thank the community** for its kindness and patience but also to develop it and to help it understand the mechanism of the POWER Bridge, we trigger a ~~airdrop~~ Technical Token Delivery Test of \$POWER MAIN.

The \$POWER MAIN has the particularity of being able to **circulate on exchanges** unlike the \$POWER ICO, COMP or SPONSORSHIP.

Thus, each \$POWER ICO holder will receive **1 \$POWER MAIN** on their custodial wallet.

Token release plan

#freepower

#powergate

#IamPOWER

#FromClioToPOWER

d⚡Xtrust

As agreed, here is the expected **progressive release scheme** for your \$POWER ICO vested 36 months under SLiPv2. (see next slide).

A "**release**" is an automatic **conversion** of a portion of your \$POWER ICO to \$POWER MAIN via the POWER Bridge with no acceleration fees.

This will be done automatically every month and will be visible on your OTCivic account.

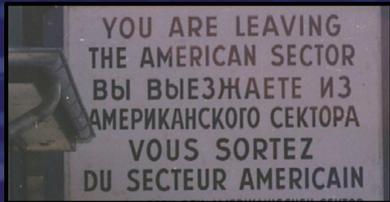

Progressive Release Plan

Every month a part (%) of your \$POWER ICO is converted into POWER MAIN, regardless of who owns the tokens and without any action on your part.

2022/1	1,11%
2022/2	2,22%
2022/3	3,33%
2022/4	4,58%
2022/5	5,83%
2022/6	7,08%
2022/7	8,49%
2022/8	9,90%
2022/9	11,31%
2022/10	12,90%
2022/11	14,48%
2022/12	16,07%
2023/1	18,05%
2023/2	20,03%
2023/3	22,01%
2023/4	25,00%
2023/5	27,98%
2023/6	30,97%
2023/7	34,48%
2023/8	37,98%
2023/9	41,49%

2023/10	45,57%

2024/3	67,69%
2024/4	72,82%
2024/5	77,95%
2024/6	83,08%
2024/7	88,48%
2024/8	93,89%
2024/9	99,29%
2024/10	100%

POWER Bridge

dOxtrust

Starting in January 2022, it will be possible to convert your \$POWER ICO into \$POWER MAIN, without any limitation.

We have always sought to provide liquidity on the \$POWER to those who want it, even if the token is new and not well known, and even if the deflation has not started. However, this should not be done at the expense of the rest of the community which through SLiPv2 has voted for a 3 year progressive vesting.

Those who wish to **exit the project quickly** and anticipate the gradual release of their tokens over 3 years can do so, by accepting an **acceleration fee**.

The "exchange rate" between ICO and MAIN will be visible and accessible directly from your account, and may vary up or down depending on the volumes and trends of the \$POWER MAIN price on DEX/CEX.

However, the objective will be that our POWER Bridge will always allow an exit for a \$POWER holder.

Fees will be charged for each use of this bridge. At launch, these will be 0.09% of the transaction amount + a flat fee of 5 \$POWER ICO

Details of passive income offers

As expected and with a “small” delay (sorry), it's time to unveil the different staking offers available.

- **Q1/2022**
 - **staking** of \$POWER
 - **farming CEFI** of \$POWER/BUSD
- **Q2/2022**
 - **farming** of \$POWER/BUSD
 - **lending** of \$POWER, \$CYP

Offer 1

POWER Staking

Did you know that?

As nouns the difference between staking and stacking (with a "c") is that staking is an act of stabbing with a stake while stacking is the act by which something is stacked.

doXtrust

Q: What is staking?

A : Staking your \$POWER tokens in a secure vault in order to obtain a remuneration linked to a period of time determined in advance by Civicpower.

Q: What is the risk?

A: \$POWER cannot be lost. A portion of the compensation will not be paid out if your \$POWER is not locked in for the full term.

Q: What is the launch offer?

A: This program launches for a 30-day first round with a \$POWER MAIN reward.

Q: Is the compounding of interest earned automatic?

A: No, not at this stage, you will have to do it manually if you wish

Concretely, it will be enough to activate the button "I stake my powers" and to choose according to the number of \$POWER available, in order to benefit immediately from passive income.

Those who stay 30 days will get the maximum of their reward, those who enter after the beginning or leave before the end, will see their return decreased.

The more participants there are in the program, the more the total reward is shared and therefore less for each participant.

Fees: 0.50% per movement.

Offer 2

CeFI Farming

doXtrust

Q: What is CeFI farming?

A: Blocking \$POWER/BUSD liquidity

Aimed at the part of our community that doesn't master the DeFi tools and wants to play without the risk of making a handling mistake
Here we will reward holders who do not sell POWER ICO released in HAND and who also add BUSD in the protocol.

This program is permanent with an APR (at the current \$POWER rate) of up to 20%.

You bring in \$POWER hand and the equivalent of their value at the moment in BUSD.

You will have a direct reward in \$POWER MAIN up to 20% annual

Example if \$POWER = \$4 then : I bring 10000 \$POWER and 40000 \$BUSD, at the end of the year I get up to 8000 BUSD of value in \$POWER MAIN (sellable on DEX/CEX).

You can enter and exit at any time, your reward is calculated according to the time spent. When you exit you get your initial contribution back.

For a pre-sale investor, this is a recalculated APR that can go beyond 500%.

Conditions:

- IN/OUT possible on Wednesday and Sunday
- outing to be planned 48 hours in advance
- requests exclusively through the interface

Advantages:

- we take care of all the handling for you
- we maximize your yield
- we take care of handling errors (which we take care of if necessary)

Fees: 0.50% per movement

Offer 3

DeFi Farming

Q : What is DeFi farming?

A : Bringing liquidity directly on the \$POWER/\$BUSD Liquidity Pool on PancakeSwap.

Intended for our community but also and especially to attract the most degenerate part of the global crypto community who master the DeFi tools.

Here, we will reward buyers of \$POWER MAIN who come to consolidate the LP with the liquidity already locked by the team, thus facilitating the exchange and the expansion of the \$POWER community.

This program will be launched with a first round of 30 days and a reward in \$POWER MAIN allowing to announce an APR beyond 1500%.

Concretely:

- I buy \$POWER on PancakeSwap,
- I bring liquidity to the \$POWER/\$BUSD LP, as a proof of this contribution PCS gives me in exchange a CAKE-LP token. It is this CAKE-LP token that you will have to come and store with us to be eligible for the reward,
- reward in \$POWER MAIN.

Fees: 0,50% per movement (stake/unstake)
PancakeSwap fees not integrated
